Thank you for your commitment to safety through out this project. The last piece of pre cast was set today and the crane is being removed. Fall protection usage was 100% by your crews as Weitz requires. Everyone gets to go home at night when we have safe construction sites and that is our goal. Please continue your pro active approach to safety, even when the general contractor does not require you to. Great job being a leader in our industry as we have dangerous jobs that we do every day. Washing/Welding/Patching will continue for a few weeks on site.....keep safety at the top of your "to do" list. Lunch was on Weitz today...hope crews liked the pizza.
